

NAEEM NOOR

DevOps Engineer | Cloud & Infrastructure Engineer

Linux | AWS | Docker | Terraform | CI/CD | Networking | Automation

Sargodha, Pakistan | +92 343 463 0023 | Fluent in English

naeem.noor03@gmail.com

PROFESSIONAL SUMMARY

Infrastructure and IT Operations professional with over 5 years of experience supporting enterprise IT environments across Pakistan, the UAE, and Australia. Experienced in Windows administration, Linux fundamentals, Active Directory, networking, enterprise endpoint management, technical troubleshooting, and IT infrastructure support within high-availability environments including Dubai International Airport.

DevOps Engineer with combine extensive infrastructure operations experience with hands-on expertise in cloud technologies, containerization, Infrastructure as Code, and automation. Passionate about building scalable, secure, and automated deployment pipelines using AWS, Docker, Terraform, GitHub Actions, Linux, and modern DevOps practices.

Strong analytical problem-solving skills with proven experience collaborating across cross-functional teams to improve operational efficiency, reduce downtime, automate repetitive processes, and enhance infrastructure reliability.

Experienced in leveraging AI-assisted tools to accelerate troubleshooting, automate documentation, improve scripting productivity, and support technical decision-making while validating outputs using professional judgment.

CORE COMPETENCIES

- **DevOps & Automation:** CI/CD Concepts, Infrastructure Automation, Deployment Automation, Git Workflows, Infrastructure as Code, DevOps Best Practices
- **Cloud Computing:** AWS Cloud Fundamentals, EC2, IAM, VPC, S3, Cloud Networking
- **Operating Systems:** Linux & Unix Administration, Ubuntu, VirtualBox, Windows Server, Windows 10/11
- **Containers:** Docker, Docker Compose, Containerization
- **Infrastructure:** Active Directory, DNS, DHCP, VPN, TCP/IP, LAN/WAN
- **Networking:** Routing, Switching, VLAN Fundamentals, Firewall Fundamentals, SSH, IP Address Management
- **Version Control:** Git, GitHub, Bitbucket
- **Monitoring:** Incident Management, System Monitoring, Performance Monitoring
- **Security:** Identity & Access Management, Endpoint Security, Access Control, Patch Management, Security Best Practices
- **Collaboration:** Agile, Scrum, Jira, Technical Documentation, Cross-functional Collaboration

TECHNICAL SKILLS

- **Cloud Platforms:** AWS (EC2, IAM, S3, VPC) (Hands-on Labs), Microsoft Azure (Fundamentals)
- **DevOps Tools:** Docker, Git, GitHub, GitHub Actions, Terraform, Jenkins, Kubernetes
- **System Administration:** Active Directory, User Provisioning, Group Policies, Access Management, Password Management, Microsoft 365 Administration
- **Programming & Scripting:** Bash, Python (Basic), PowerShell, SQL, HTML, CSS, JavaScript, PHP, ReactJs
- **Databases:** MySQL, PostgreSQL
- **Tools:** Jira, AnyDesk, TeamViewer, MobaXterm, Remote Desktop, Docker Desktop, QuickBooks
- **AI Tools:** ChatGPT, GitHub Copilot, Microsoft Copilot for technical troubleshooting, documentation, scripting assistance, automation, and research.

CERTIFICATIONS

- Google IT Support Professional Certificate
- Google Foundations of Project Management
- Cloud Computing: Understanding Core Concepts (LinkedIn Learning)

EXPERIENCE

Information Technology Support Technician | March 2026 – July 2026

Hader Security & Communications Systems | Abu Dhabi, UAE

Environment: Windows | Networking | Enterprise Infrastructure | Security Systems | Radio Communications | LAN/WAN | Technical Support

Key Responsibilities & Achievements:

- Installed, configured, and maintained enterprise IT infrastructure, including desktops, laptops, networking equipment, communication systems, and endpoint devices across multiple client environments.
- Diagnosed and resolved hardware, software, operating system, and network connectivity issues, consistently minimizing downtime and ensuring business continuity.
- Configured IP addressing, TCP/IP settings, DNS, DHCP, and LAN/WAN connectivity while supporting infrastructure deployment and maintenance activities.
- Assisted with deployment, configuration, testing, and troubleshooting of security appliances, communication systems, and network infrastructure.
- Performed preventative maintenance, system upgrades, and hardware replacement to improve infrastructure reliability and reduce recurring incidents.
- Supported installation, configuration, and troubleshooting of radio communication systems used in mission-critical operational environments.
- Collaborated with infrastructure engineers, field technicians, and project teams to deliver technical solutions within project timelines.
- Maintained technical documentation, equipment records, and deployment procedures to support operational consistency and knowledge sharing.
- Delivered on-site technical support while ensuring compliance with organizational security policies and technical standards.

IT Administrative Assistant | January 2024 – February 2026

Transguard Group LLC | Emirates Engineering | Dubai International Airport DXB

Environment: Enterprise IT | Microsoft 365 | Active Directory | Windows | Endpoint Support | Help Desk | IT Operations

Key Responsibilities & Achievements

- Delivered high-quality technical support in a mission-critical airport environment while maintaining minimal downtime and excellent customer satisfaction.
- Administered user lifecycle management, including Active Directory account provisioning, password resets, permission assignments, and access control in accordance with organizational security policies.
- Diagnosed and resolved desktop, laptop, printer, Microsoft Office, Outlook, email, software, and network-related incidents through structured troubleshooting methodologies.
- Supported endpoint deployment, hardware installation, software configuration, and workstation provisioning for new employees and operational teams.
- Assisted with patch management activities, endpoint security compliance, software updates, and routine system maintenance to maintain operational stability.
- Worked closely with internal IT teams to investigate infrastructure incidents, escalate complex technical issues, and ensure timely service restoration.
- Managed IT asset inventory, equipment allocation, and lifecycle documentation while maintaining accurate operational records.
- Contributed to Help Desk operations by prioritizing incident tickets, maintaining service levels, and delivering high-quality end-user support.
- Produced technical documentation, knowledge base articles, and operational reports to improve support efficiency and standardize support procedures.
- Consistently maintained excellent customer satisfaction while supporting fast-paced airport operations with minimal service disruption.
- Successfully supported IT operations within a high-availability enterprise environment serving hundreds of operational users.

IT Support Specialist | Sep 2022 – December 2023

PriceOye Technologies Limited | Islamabad, Pakistan

Environment: Linux | Docker | Web Applications | MySQL | Jira | Git | GitLab | QuickBooks | REST APIs | Technical Support

Key Responsibilities & Achievements

- Delivered Level-2 application and infrastructure support for business-critical internal systems and operational platforms, ensuring high system availability and reliable user experience.
- Diagnosed and resolved application, database, and integration issues by collaborating with software engineering and operations teams to minimize production downtime.
- Supported deployment, configuration, and maintenance of third-party integrations, including QuickBooks and TCS logistics systems.
- Assisted with troubleshooting API integrations, application configurations, authentication issues, and user-reported defects.
- Performed log analysis and root cause investigation to identify recurring issues and recommend long-term improvements.
- Worked closely with developers during software releases, testing activities, and production deployments to ensure successful implementation.
- Documented technical procedures, troubleshooting guides, and known issues to improve operational efficiency and reduce incident resolution time.
- Participated in Agile development processes, collaborating across technical and business teams to deliver reliable software solutions.

Key Achievements

- Improved application stability through proactive troubleshooting and close collaboration with development teams.
- Reduced recurring support incidents by maintaining technical documentation and standardized troubleshooting procedures.

IT Support Specialist | March 2022 – August 2022

AlphaSquad | Islamabad, Pakistan

Environment: Linux | Web Applications | Linux | Git | Client Support | Website Operations

Key Responsibilities & Achievements

- Provided technical support for internal applications and web platforms, ensuring continuous availability of business services.
- Diagnosed and resolved software, networking, and application-related issues reported by internal users and external clients.
- Assisted development teams during application deployment, testing, and production support activities.
- Collaborated with clients and technical stakeholders to prioritize incidents and ensure timely issue resolution.
- Performed application monitoring, functional testing, and verification after deployments to maintain platform stability.
- Created technical documentation, user guides, and troubleshooting procedures for recurring operational issues.
- Supported continuous improvement initiatives by identifying process inefficiencies and recommending technical enhancements.

Technical Support (Remote) | June 2021 – February 2022

Currinda Pty Ltd | Melbourne, Australia

Environment: Linux | Jira | Agile | BitBucket | Docker | SaaS Platform | Remote Support | Incident Management

Key Responsibilities & Achievements

- Delivered remote technical support for enterprise event management and SaaS platforms serving international customers.
- Investigated and resolved software issues, user-reported incidents, and configuration problems through structured troubleshooting methodologies.

- Managed technical support requests using Jira while maintaining detailed documentation of incidents, root causes, and resolutions.
- Collaborated with software developers, QA engineers, and product teams within Agile sprints to improve platform stability and customer experience.
- Assisted with application testing, release validation, and post-deployment support activities.
- Developed and maintained internal knowledge base documentation to improve support efficiency and knowledge sharing.

Key Achievements

- Maintained high customer satisfaction by providing timely remote support across multiple time zones.
- Improved incident response through effective ticket management and cross-functional collaboration.

Full Stack Developer | April 2021 – February 2022

Friends IT Solutions | Rawalpindi, Pakistan

Environment: React | Vue.js | Laravel | PHP | MySQL | Git | Web Development

Key Responsibilities & Achievements

- Designed and developed responsive full-stack web applications using React.js, Vue.js, Laravel, PHP, and MySQL.
- Built reusable frontend components and implemented modern state management techniques to improve application maintainability.
- Developed RESTful APIs and backend services while optimizing database performance and application responsiveness.
- Collaborated with cross-functional teams using Git-based version control and Agile development methodologies.
- Assisted with application deployment, debugging, testing, and production issue resolution.
- Participated in code reviews, software maintenance, and feature enhancements to improve application quality.
- Implemented secure authentication, user management, and database integration features following software development best practices.

PROJECTS

Enterprise CI/CD Pipeline with GitHub Actions

Objective:

Designed and implemented an automated Continuous Integration and Continuous Deployment (CI/CD) pipeline for a containerized web application to streamline software delivery and reduce manual deployment effort.

Responsibilities:

- Configured GitHub Actions workflows to automate build, test, and deployment processes.
- Automated Docker image creation and publishing.
- Implemented branch-based deployment strategies.
- Added automated code quality and syntax validation.
- Optimized deployment consistency through pipeline automation.

Technologies: GitHub Actions | Docker | Git | Linux | YAML

AWS Infrastructure as Code using Terraform

Objective:

Provisioned cloud infrastructure using Infrastructure as Code (IaC) to automate resource deployment and ensure consistent infrastructure management.

Responsibilities:

- Created reusable Terraform modules.
- Provisioned EC2 instances, VPCs, Security Groups, IAM roles, and S3 buckets.
- Configured remote Terraform state management.
- Implemented modular infrastructure architecture.
- Managed infrastructure version control using Git.

Technologies: AWS | Terraform | EC2 | IAM | S3 | VPC | Git

Dockerized Multi-Tier Web Application

Objective:

Containerized a multi-tier application to simplify deployment, improve portability, and standardize development environments.

Responsibilities:

- Built custom Docker images.
- Configured Docker Compose for multi-container orchestration.
- Implemented persistent storage using Docker volumes.
- Created isolated container networking.
- Improved application portability across environments.

Technologies: Docker Desktop | Docker Compose | Linux | MySQL

Office Network Design and Subnetting Lab | Cisco Packet Tracer

Objective:

Designed and implemented a small office network consisting of HR and IT departments using Cisco Packet Tracer. Performed IPv4 subnetting on network 192.168.40.0/24, creating two /25 subnets, configured routing between networks, assigned IP addresses, and connected PCs and printers. Gained hands-on experience in network design, subnetting, routing, switching, and IP address management.

Technologies: Cisco Packet Tracer | Networking | Subnetting | Routing & Switching | IPv4 | TCP/IP | Network Design | Troubleshooting

EDUCATION

Bachelor of Computer Science

University of Engineering & Technology (UET), Taxila, Pakistan

February 2017 – March 2021
